

# Problem B

## Apple Orchard

Time Limit: 15 second(s)  
Memory Limit: 2G

Farmer John has many apple trees on his farm. Each apple tree has a circular area that provides shade during the hot summer. Farmer John is creating a pen for his cows and has several locations in mind. For each fenced off area he wants to know the percentage of that proposed area that is shaded.

Each proposed fenced off region is rectangular in shape, axis aligned, and specified by its lower left corner and the width and height of the region. Calculate the percentage of shaded area for each proposed fenced off rectangle.

### Input

The first line of input contains two integers  $n$  ( $1 \leq n \leq 3,000$ ) and  $q$  ( $1 \leq q \leq 3,000$ ), where  $n$  is the number of apple trees in Farmer John's orchard, and  $q$  is the number of rectangular fenced regions he wishes to test.

Each of the next  $n$  lines contains three integers  $x, y$  ( $-10^6 \leq x, y \leq 10^6$ ) and  $r$  ( $1 \leq r \leq 10^6$ ). Each line describes the circular shaded area of a tree, where  $(x, y)$  is its center and  $r$  is its radius. Note that the trees can have very twisted trunks, so it is possible for two shaded areas to have the same center, or even be identical.

Each of the next  $q$  lines contains four integers  $x, y$  ( $-10^6 \leq x, y \leq 10^6$ ),  $w$  and  $h$  ( $1 \leq w, h \leq 10^6$ ). Each line describes a rectangular region Farmer John wishes to test. The rectangle has a diagonal from  $(x, y)$  to  $(x + w, y + h)$ .

### Output

Output  $q$  lines, each containing a single real number, which is the percentage of that rectangle which is shaded, on a scale from 0 to 100. Output the percentages for the rectangles in the order that they appear in the input. Each value should lie within a relative or absolute error of  $10^{-5}$  of the judges' answer.

**Sample Input 1**

```
2 2
0 0 3
2 1 4
0 0 3 3
-3 -3 6 6
```

**Sample Output 1**

```
100
89.53678472917
```

**Sample Input 2**

```
4 3
-1 -1 3
1 -1 3
-1 1 3
1 1 3
-4 -4 8 8
-1 -4 2 8
-3 -1 12 3
```

**Sample Output 2**

```
87.2221423775645
98.5869913729161
57.8623304576387
```
